

Class Test on Object Oriented System Design

F.M. = 20

(All the questions carry equal marks)

1. Write a Java program to show that this keyword can be passed as an argument in the method call.
2. Write a program to create a class that has a static method "Compute", which calculates the % of marks obtained by the students. For the five students having their marks on Physics, Chemistry and Mathematics, calculate the % of marks obtained by them.
